Art Unit: 2862

1. The indicated allowability of claims 5-8, 14 and 16-19 is withdrawn in view of the newly discovered reference(s) to Lechen (U.S. Patent No. 6,647,637). Rejections based on the newly cited reference(s) follow.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIA (pre-AIA 35 U.S.C. 102(e)).

3. Claims 1-4, 7, 8, 11-13, 15, 16, 18, 19 and 22-24 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Lechen (see figs. 9 and 10).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2862

5. Claims 6 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lechen.

Lechen discloses all of the claimed subject matter except for the first and second sensors measuring the same component of the magnetic field. This feature is considered an obvious design consideration, well within the capabilities of one skilled in the art.

6. Claims 9, 10, 21 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
